

CASH TESTER

A Cennox Group Company

BC 283 SD

State-of-the-art 1+1 Pocket banknote valuecounter.

The **BC 283 SD** meets every need of the professional user: multi-currency, value counting, serial number reading, touchscreen and much more. Counterfeit or different banknotes are sorted by the **BC 283 SD** into a separate compartment without interrupting the counting. Of course, other criteria can also be selected, such as value (per denomination), 'heads' and input direction (orientation).

Next to rejecting suspect notes, you can also program the **BC 283 SD** to sort out on denomination, orientation or other criteria. Updating to the latest software can be done via the integrated micro SD card reader, the network connection or via the computer.
